

## **Cancel Orders in EpicCare Link**

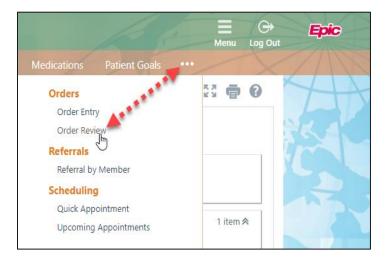

It is important to cancel orders that were placed but no longer needed. Instances where a patient has been discharged or where orders have been changed or discontinued by the physician are examples of when it is appropriate to cancel an order. One benefit of this practice is that it will keep from printing out unnecessary specimen labels that generate each day.

## Try It Out

1. Hover over the **Patient** option at top of the EpicCare Link Home page.

- 2. Select Order Review.
  - Or Click **Select Patient**, then hover over the 3 dots to reveal additional options.

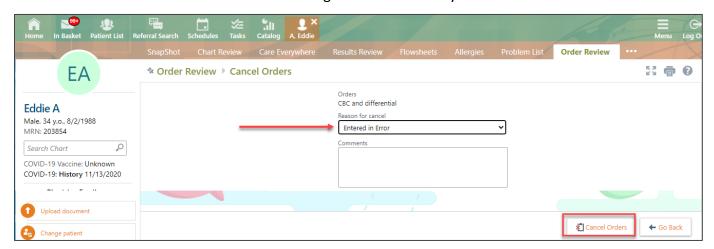

3. Search for or Select the patient.

- 4. Place a checkmark in the box next to the order you wish to cancel.
- 5. Click the Cancel Orders button.

- 6. Select a Reason for the cancellation in the **drop down**.
- 7. Click the **Cancel Orders** button on the bottom right-hand corner of your screen.

8. The Order Status column should now reflect a status of Discontinued.
